Fort De Russy Society

(Special Star-Bulletin Correspondence.)
FORT DE RUSSY, June 16.—The largest affair of the week was the hop supper given last night by Captain and Mrs. Robert Duenner for twenty-seven guests. Several of the guests enjoyed a swim at De Russy in the afternoon. A delicious supper was served at small tables, and the party was a very jolly and informal one. Later in the evening Captain and Mrs. Duenner took their guests to the hop at the Administration building.

Much to the regret of everyone on the post Major Edward Carpenter left last week on the transport for the mainland.
Captain and Mrs. Louis D. Pepin were host and hostess last evening at a most enjoyable supper preceding the hop. Some of the guests enjoyed a swim in the afternoon. The party was seated at one long table, which was beautifully decorated with yellow Marguerites, artistically arranged in a tall crystal vase, while several crystal bowls on the table held the same flowers. Unshaded yellow candles in crystal stands added a charming finishing touch.
The placecards carried out the color scheme, and marked covers for Captain and Mrs. George Ruhlen, Captain and Mrs. Frederick L. Martin, Captain John F. Curry, and Captain John B. Brooks of Fort Kamehameha; Miss Louise Clark of Pearl Harbor; Lieutenant and Mrs. Stephen H. MacGregor, Miss Marjorie Capps, Mrs. Reed, and Mr. William Warren of Honolulu; Lieutenant and Mrs. Samuel J. Pepin also entertained at a large supper, both parties attending the hop later in the evening.

Baby Should be Fed Naturally if Possible

No substitute can give such good results as Nature's method—nothing can take its place.
At times, however, it is necessary in warm climates to use Condensed Milk, and the mother should know that there is no purer, richer product than Highlander Condensed Milk (full cream). Prepared from the milk of healthy carefully tested cows on the rich pastures of Scotland, New Zealand, scrupulous care and cleanliness mark every step of the process of manufacture. Highlander is the finest, rich, pure milk, with part of the water removed by evaporation.
When the time comes to wean baby, however, Highlander Condensed Milk is of special value. The famous infant specialist, Dr. Eric Frickard, points out that the caseinogen—the indigestible element for young children in fresh milk—is altered by the process of condensing and is more digestible—almost like a peptonized milk.
He believes that Condensed Milk is of special value in aiding over the change from breast to ordinary milk, and thinks that the child should be given an increasing proportion of fresh cow's milk with condensed milk until gradual training of its powers of digestion enables it to take fresh milk entirely.
